We have been using the new WT1 roof and wall sealant from C- Tec and are extremely happy with how it performs. It has easy application and we have been using it on Trocal roof repairs, PVC and metal gutters and various flat roofs.

I have had trouble in the past getting a product that I can rely on but this one product seems to outperform the rest. Having 23years in construction behind me I can truthfully say that this is the best sealant product to come to the market.

I would happily recommend it to anyone.
