Award letter - NAAF product labelling

Product: CT1, by C-TEC N.I. Limited

The Norwegian Asthma and Allergy Association hereby confirms that CT1 Unique Sealant & Construction Adhesive (CT1) has been risk assessed with focus on product characteristics that facilitate increase in quality of life for NAAF's target groups. CT1, is hereby entitled to use the NAAF label and the wording "recommended by NAAF/ anbefalt av" in its marketing and sales purposes, provided the existence of a valid written agreement with NAAF.

NAAF's aim is to fulfill the organization's strategy and plan of action. Product labelling is one of NAAF's many tools to achieve such goals, which include increasing public awareness of more allergy friendly product choices, such as identifying quality building and construction products with low emission and a more health friendly formulation. CT1 has been risk assessed by NAAF and found suitable for our target groups. The product will cover most relevant uses, given that the product is used according to the manufacturer's recommendation, together with good environment, health and safety (EHS) practice.

Detailed and official information regarding NAAF's product recommendation is exclusively available at www.naaf.no.
